

# Neurorehabilitation Outcomes

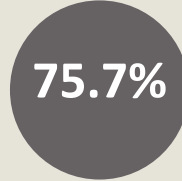

## Our Average vs. National Average

**DISCHARGE  
DESTINATION TO  
COMMUNITY**  
(Greater is better)

Our Average

National Weighted Average

Our Neurological Diagnosis Rehabilitation patients are discharged to the community more frequently than national average. Based on CMS definition of community = home, board and care, and assisted living.

**LENGTH OF STAY**  
(Lower is better)

Our Average

National Weighted Average

Our program's Neurological Diagnosis Rehabilitation patients had a lower LOS than national average, with higher percentage discharged to community as above.

**QI GAIN**  
(Greater is better)

Our Average

National Weighted Average

From admission to discharge, FIM gain (functional improvement) is greater within our hospital than national weighted averages (our patients gained more functional outcomes as compared to national users).

**QI SCORE ON  
DISCHARGE**  
(Greater is better)

Our Average

National Weighted Average

Our Neurological Diagnosis Rehabilitation patients' functional scores are higher than national average upon discharge.

**RETURN TO  
ACUTE CARE**  
(Lower is better)

Our Average

National Weighted Average
