

Our 2019 Outcomes

Our Average vs. National Average

**DISCHARGE
DESTINATION TO
COMMUNITY**
(Greater is better)

67.8%

Our Average

65.1%

National Weighted Average

Comparing those programs with similar cases. Our rehab patients are discharged to the community more frequently than national average. Based on CMS definition of community = home, board and care, and assisted living.

LENGTH OF STAY
(Lower is better)

13.2
days

Our Average

15.0
days

National Weighted Average

Our program's rehab patients had a lower LOS than national average, with higher percentage discharged to community as above.

FIM GAIN
(Greater is better)

28.2

Our Average

30.3

National Weighted Average

From admission to discharge, FIM gain (functional improvement) during the rehab stay was near the national average for similar rehab cases.

**FIM SCORE ON
DISCHARGE**
(Greater is better)

87.4

Our Average

85.1

National Weighted Average

Our rehab patients' functional scores are higher than national average upon discharge.

**RETURN TO
ACUTE CARE**
(Lower is better)

8.5%

Our Average

8.8%

National Weighted Average
