

Hip Fracture Outcomes

Our Average vs. National Average

**DISCHARGE
DESTINATION TO
COMMUNITY**
(Greater is better)

91.67
%

Our Average

83.51
%

National Weighted Average

Our hip fracture patients are discharged to the community more frequently than national average. Based on CMS definition of community = home, board and care, and assisted living.

LENGTH OF STAY
(Lower is better)

9.42
days

Our Average

9.75
days

National Weighted Average

Our program's hip fracture patients had a lower LOS than national average, with higher percentage discharged to community as above.

FIM GAIN
(Greater is better)

27

Our Average

22.35

National Weighted Average

From admission to discharge, FIM gain (functional improvement) is greater within our hospital than national weighted averages (our patients gained more functional outcomes as compared to national users).

**FIM SCORE ON
DISCHARGE**
(Greater is better)

94.67

Our Average

93.37

National Weighted Average

Our hip fracture patients' functional scores are higher than national average upon discharge.

**RETURN TO
ACUTE CARE**
(Lower is better)

8.33%

Our Average

10.2%

National Weighted Average
