

Meet EVS Technician Shelly Hoselton

Shelly recently started at ORHC in Environmental Services, after searching for a job that would be self-rewarding. Shelly works 3rd shift, a typical day for her includes gathering supplies, cleaning the wound center and infusion area, and cleaning anywhere else that she is called to during her shift. Cleaning areas includes patient rooms, hallways, waiting rooms, lobby area, bathrooms, and anything else the eye can see and hands can touch.

“It’s all about making it a safe place. We disinfect and sterilize everything as much as possible,” Shelly said. “I try to imagine that it is one of my family members here. I ask myself, how would I feel if this didn’t get cleaned? I take pride in having a safe environment.”

“If she sees something that needs to be done, she does it without a complaint. Shelly, offers help to anyone that she sees is in need and she always goes the extra mile for excellence,” says Director of EVS, Rita Ogden. “Shelly understands that her work is a reflection of herself as well as the team and that means something to her.”

“I feel good about making the hospital environment clean and safe for patients and families. I really like the interactions I occasionally have with patients. I try to brighten their day and be as helpful as I possibly can be.

ORHC thanks Shelly for ensuring that every patient at ORHC has a safe, clean, and quality patient experience.
